DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. Claims 10, 12-13, 15, and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. Claim 4 is claiming limitation of non claimed combination of the tool and attachment. This must be positively recited or else the limitations are indefinite.
 - b. Claim 10 is reciting a method of manufacturing step in an apparatus claim."injection molding". This claim is indefinite.
 - c. Claims 14 and 19 are modifying a part that is not part of claimed invention. The nose is has not been positively recited as part of the attachment. Therefore it is improper to modify the nose which renders the claim indefinite.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 3-11, 14, and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kopras (6048260) in view of Keith jr et al (5607343).
 - a. Kopras discloses an attachment having a housing (36), a mounting collar(42) with slots (44) .

Application/Control Number: 10/648,041 Page 3

Art Unit: 3723

b. Kopras does not disclose a thin annular cylindrical layer between the housing and the nose.

- c. Keith et al disclose an attachment having a disclose a thin annular cylindrical layer (70) between the housing and the nose which is used to reduce friction between the two parts.
- d. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Kopras device by providing a thin annular cylindrical layer as taught by Keith et al. which is used to reduce friction between the two parts.
- e. The modified Kopras discloses the claimed invention except for a range of .6mm to .2mm of layer thickness. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a range of .6mm to 2.mm for the layer thickness, since it has been held that where general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233*.
- f. Claim 4 art is applied as best understood therefore since no combination is be claimed prior art can reject with a non recited combination as well.

Allowable Subject Matter

3. Claims 2,15-16, and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/648,041 Page 4

Art Unit: 3723

4. Claims 12-13 and 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. THOMSON discloses a device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE D. WILSON whose telephone number is 571-272-4499. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JOSEPH HAIL can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
